

To Determine Your Trouser Belt Size (Length):

We recommend purchasing a **Garrison Trouser Belt** that is 1-2 inches greater than your pants waist size, or ONE SIZE UP. For example, if you wear a size 34 pants, you would order a size 36 belt. We do not offer odd sizes (33, 35, 37, etc.) so you should select a belt size that is 2 inches greater than your waist/pants size. If you take an odd size pants, e.g. size 35, following the 1-2 inch guideline, you should order a size 36. Again, we do not offer odd sizes, and a size 38 is 3 inches greater, which is too big. Please note: If you wear your holster inside your belt, you need to add 2 inches (one size) MORE than the one size up. E.g. if your pants size is 34 and you wear your holster inside your belt, you should order a 38 belt.

Sam Browne Duty Belts: ONE SIZE UP does *not* apply. Stallion adds 2 inches to the Sam Browne belts to fit over the Garrison Trouser Belts. So if the Officer wears a size 38 trouser, he should order the Garrison Trouser Belt one size up and then select the Sam Browne belt **in the same size** as the Garrison Trouser Belt. Please note: If you wear your holster inside your belt, you need to add 2 inches (one size) more to the base (Garrison) belt.

Sizing your belt is essential to your comfort and it is *your responsibility*. Each Stallion belt is customized from the selections you make in the dropdowns. If you have any questions concerning sizing, please give us a call. Customized belts cannot be returned or refunded for sizing issues alone. Standard Warranty guidelines still apply. Call us at 888-909-8760 and we will assist you in any way we can.
